Microvi Biotech Presents its Platform Clean Technology at Cleantech 2007

Overland Park, Kansas (May 15, 2007) -- Microvi Biotech will be presenting its platform water technology at Cleantech 2007 on May 23 in Santa Clara, California. Microvi Biotech's platform technology is based on years of continuous discoveries and the research and development of advanced biotechnologies to effectively destroy many difficult pollutants in water resources. Unmatched with conventional processes, Microvi's technology offers clean, waste-free, and low-energy solutions with the highest water quality that is attractive across a wide range of applications in water and wastewater treatments.

Cleantech 2007 is the premier event showcasing the world's largest collection of undiscovered clean technologies emanating from start-up companies, top universities, labs, and research institutions from across the country and around the globe. Participating technologies are selected by - and presented to - seasoned venture investors and Fortune 500 licensing scouts representing a variety of industries. "We are looking forward to presenting our breakthrough technology for advanced water purification systems to such an influential target audience," said Dr. Fatemeh Shirazi President & CEO. "Microvi Biotech's collection of innovative technologies provides new approaches for managing, preserving, and restoring the environment and is among the first technologies to demonstrate naturally waste-free operation. Cleantech 2007 offers Microvi Biotech a highly visible platform and we welcome the opportunity to present our unique technologies at this event."

About the Cleantech 2007

Cleantech 2007 is a multi-disciplinary and multi-sector conference on global sustainability addressing advancements in traditional technologies, emerging technologies and clean business practices. The mission of Cleantech 2007 is to bring together the entire cleantech ecosystem with the goal of accelerating the flow of technologies from the research phase to the viable market phase. We do this by linking scientists, engineers and researchers with potential business, financial and government partners.

About Microvi Biotech

Microvi Biotech, LLC is a leading environmental biotechnology company that discovers, develops, manufactures, and commercializes innovative market-driven technologies for unmet needs in clean water. Anchored by a market-driven R&D philosophy, the company focuses on turning early-stage research and development into smarter, smaller, faster, and cleaner commercial products.
