Press Release

Microvi Biotech Welcomes Christoph Lueneburger to its Business and Scientific Advisory Board

Overland Park, Kansas (April 11, 2008) -- Microvi Biotech, a leader in developing waste-free and natural water treatment technologies, announced today the addition of Christoph Lueneburger to its Advisory Board. Focusing on the cleantech sector, Mr. Lueneburger is a human capital and strategy consultant with Egon Zehnder International in New York City. Prior to joining Egon Zehnder, Mr. Lueneburger led the water investment practice at 3Stone Advisors LLC, a cleantech-centric private equity house. His previous professional career included the roles of managing partner of a quant hedge fund and general manager of a European advanced materials manufacturer.

“We are delighted to have Christoph join our team. His wealth of knowledge and expertise in private equity and water market is a perfect addition to our distinguished scientific and advisory board” said Dr. Fatemeh R. Shirazi, President and Chief Technology Officer of Microvi Biotech.

“The water industry spans a fragmented spectrum of diverse markets with distinct needs,” said Mr. Lueneburger. “Microvi’s innovative pursuit of technologies capable of harnessing rather than repressing natural processes heralds an emerging class of solutions with universal potential. I am honored to join the company’s advisory board.”

In addition to frequently speaking at and moderating forums dedicated to water and sustainability, Mr. Lueneburger has been published in industry periodicals such as WC&P International, Journal AWWA, Global Water Intelligence and Environmental Finance. He is a licensed professional engineer and holds a B.S. in Mechanical Engineering, a Minor of Arts in Philosophy, and an M.S. in Fluid Dynamics from Purdue University as well as an MBA from INSEAD.

About Microvi Biotech

Microvi Biotech is a leading environmental biotechnology company that discovers, develops, manufactures, and commercializes innovative market-driven technologies for unmet needs in clean water. Anchored by a market-driven R&D philosophy, the company focuses on turning early-stage research and development into smarter, smaller, faster, and cleaner commercial products.
