Press Release

Microvi Biotech Invited to Discuss the Current and Future Unmet Needs of the Clean Water Industry

Union City, CA (December 2, 2008) – Dr. Fatemeh Shirazi, the President and Chief Technology Officer of Microvi Biotech Inc., was recently invited to participate in a water panel discussion organized by the Gerson Lehrman Group (GLG) Clean Tech Summit <https://www.glggroup.com/clean-tech-summit.html> in San Francisco. In her discussion, Dr. Shirazi pointed out the emerging issues and trends within the clean water technology space and the future of the industry, as well as the critical strategies needed in the coming decades. Stressing on the importance of the innovative clean technologies to meet the challenges of water scarcity and shortages, she offered insights on the issues that will help define the future direction of the water industry. Dr. Shirazi also discussed how Microvi's technologies are rapidly penetrating into the market and replacing conventional waste-generating and costly treatment systems.

Microvi Biotech has taken a fundamentally new approach to water treatment. Designed with the environment in mind, Microvi's award-winning technologies consist of a single-step degradation process through which major pollutants are completely destroyed. The platform for Microvi's breakthrough includes using proprietary MB™ Technology, which combines advanced biotechnology designs and natural and effective processes. The event, which took place on November 19 & 20, 2008, was attended by decision-makers and executives at some of the world's asset management firms, executives at Fortune 1000 corporations, partners at major professional services firms and experts in the field.

About Gerson Lehrman Group

Gerson Lehrman Group (GLG) manages the world's leading network of experts. Since 1998, its platform for collaboration and consultation has helped the world's leading financial services firms, professional service firms, corporations, and nonprofits find, engage, and manage experts across a broad range of industries and disciplines. GLG facilitates more than 20,000 transactions each month (average). GLG carefully recruits experts and assembles them into global networks - the GLG Councils. GLG has the world's largest expert recruiting team and most scalable expert contracting systems to support its constantly growing network, all to ensure that decision makers have fast access to expertise that is relevant, essential, and appropriate to their research needs.

About Microvi Biotech Inc.

Microvi Biotech Inc. is a leading environmental biotechnology company that discovers, develops, manufactures, and commercializes innovative market-driven technologies for unmet needs in clean water. Anchored by a market driven R&D philosophy, the company focuses on turning early-stage research and development into smarter, smaller, faster, and cleaner commercial water treatment technologies.
