Microvi Biotech Announces the Appointment of Two New Board Directors

Union City, California (July 16, 2009) -- Microvi Biotech, a leader in developing clean technologies for water and energy, and other industries, announced today that Michael Dimitriou and Perry Solomon have joined the Microvi Biotech Board of Directors.

Michael Dimitriou is a nationally respected water technology and water quality professional with over 30 years of experience in water and wastewater treatment systems design. He has led in the design of numerous treatment systems for both municipal and industrial clients in the US, Europe and Asia. He has been active in the development and introduction of new global water technologies since 1984. In addition to serving on Research Committees for various water organizations, he has served as a member of the Technology Working Group for the initial Disinfection Byproducts Regulations. Michael also served as a member of the USEPA Federal Advisory Committee on Stage-1 Disinfection Byproducts, Stage-2 Disinfection Byproducts and Filtration Rules, and the National Drinking Water Advisory Council. He is a past Director of Water Technology for ITT Industries Advanced Water Treatment Division and for Degremont North America, Suez Environmental. Michael is committed to bringing Microvi's technology to market and building a sustainable business model. "I believe that Microvi's technologies' unique advantages and innovation in treating water will allow both industry and municipal utilities to treat water more efficiently, to higher quality levels, and more cost effectively than any other technology presently in use. This is a breakthrough technology for this industry. "

Perry Solomon is currently an Executive-in-Residence at Battery Ventures. Perry brings twenty years as a successful CEO of private equity supported ventures. He most recently served as CEO of Legalink/Wordwave, a global litigation support company focused on court reporting, trial presentation and captioning. Under his leadership, the company successfully integrated 26 acquisitions and was acquired by Merrill Communications. Perry was also CEO of BMS, a SaaS provider of software and services to Chapter 7 bankruptcy trustees. Prior to entering the litigation support industry, Perry spent 10 years at Fidelity Capital, the venture arm of Fidelity Investments. During his tenure there, he was the CEO of Boston Coach and founded HR Logic, an HR BPO company. "Microvi has spent several years developing a very valuable portfolio of patents providing the Company with myriad commercial opportunities in water, bio-fuels and other areas. I am proud to join the Company's Board as we begin the rewarding process of commercializing our science."

Dr. Fatemeh Shirazi, President/CEO and Chairperson of the Board, said, "We are honored to welcome Michael and Perry to our Board of Directors. Their experience and judgment will be most valuable to the Board and the Company as we expand and explore strategic growth opportunities. Even more, Michael and Perry's appointments demonstrate our commitment to becoming a world leader in providing clean technologies. Perry's financial discipline and expertise, and Michael's proven leadership, experience and judgment will be great assets to help Microvi Biotech take advantage of the tremendous growth opportunities ahead for its exclusive clean technologies."

About Microvi Biotech Inc.

Microvi Biotech Inc, is a leading biotechnology company that discovers, develops, manufactures, and commercializes innovative market-driven technologies for unmet needs in water, energy, and other industries. Anchored by a market-driven R&D philosophy, the company focuses on turning early-stage research and development into smarter, smaller, faster, and cleaner commercial products.
