Microvi Biotech Welcomes an Advanced Oxidation Expert into in Business and Scientific Advisory Board

Overland Park, Kansas (September 6, 2006) -- Microvi Biotech, the creator of advanced biotechnologies utilizing its unique micro-encapsulation processes for decontamination of water and air pollution control, agricultural run-off management, and bioterrorism sensing, announced the addition of Ms. Joan Brackin as a Scientific Advisory Board Member. Ms. Brackin has 23 years of experience in the development and application of novel environmental technologies. Ms. Brackin spent 17 years at Monsanto Corporation as a Senior Scientist where she was involved in the development of proprietary engineered products such as microencapsulated microbial pesticides, herbicide-tolerant agricultural crops, microbial gene tracking systems, novel fluidized bed reactors, and zero-valent iron reactive barriers.

"We are delighted to have Joan join our team. Her wealth of knowledge in the advanced environmental technologies is a perfect addition to our distinguished scientific and advisory board" said Dr. Fatemeh R. Shirazi, President and Chief Technology Officer of Microvi Biotech.

Ms. Brackin holds an M.S. degree in Industrial Microbiology and a B.S. degree in Civil Engineering. Ms. Brackin is also the owner of T.A.O. Technologies, Inc, an engineering consulting company that specializes in advanced oxidation processes and ozone-based technology for the remediation of contaminated groundwater and wastewater. Ms. Brackin currently resides in San Diego, California.

About Microvi Biotech

Microvi Biotech, LLC is a leading environmental biotechnology company that discovers, develops, manufactures, and commercializes innovative market-driven technologies for unmet needs in clean water. Anchored by a market-driven R&D philosophy, the company focuses on turning early-stage research and development into smarter, smaller, faster, and cleaner commercial products.
